

THE SMART WAY™

# STS: Safway Tracking System

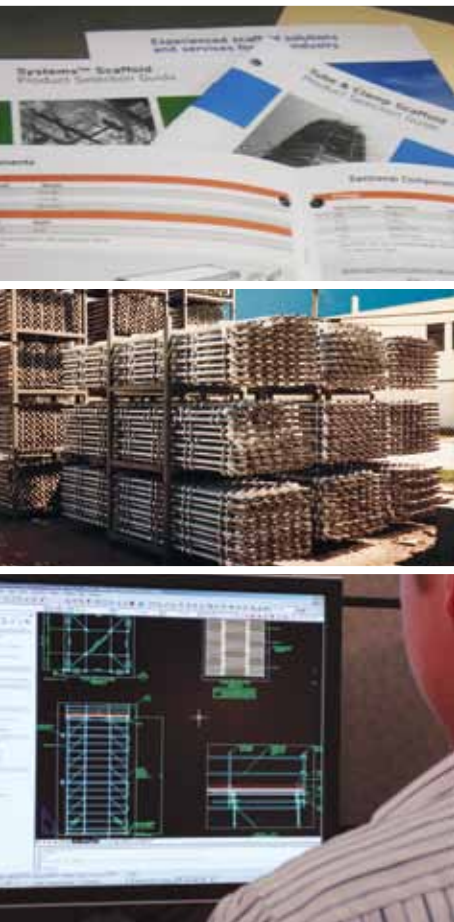

**Detailed Cost Management  
for Improved Productivity**

# STS — The most powerful cost management tool available.

Transparency. Information. Power. What gets measured gets managed. What gets managed gets results. The Safway Tracking System (STS) is an exclusive management tool that captures real-time data and provides up-to-the-minute reports on your project's labor, materials, costs and inspections – from start to finish. Beginning with historical comparisons, all the way through completion of the project, STS provides all the information you need in easy-to-read reports. That's The Smart Way™.

STS is easy to use. We set it up and provide everything you need to stay on top of all Key Performance Indicators (KPI's). Instead of working harder, let us help you manage your project smarter.

## STS Bottom Line Reports

When you're managing a complex project, you need up-to-date information on inventory, labor, management, scheduling and costs. STS provides numerous reports with detailed information on every aspect of your project that you can access at any time. We can also reformat reports as needed and provide data from multiple jobsites. Included in your reports will be information on equipment use and location, services, daily and total hours worked, costs and inspection tracking. The data provided will allow you to check in on every aspect of the project and allows us to stay on top of all key performance indicators. The bottom line? More clarity and transparency, better information and improved productivity and organization – and ultimately lower total installed costs.

## Historical Job Data

For many of our customers, a major benefit of the Safway Tracking System is the historical data it provides. Through STS, you can reference labor, materials and costs on previous projects – including detailed critical

path records pertaining to equipment and personnel – useful information to have on hand during the planning process. By carefully reviewing the KPIs established for each job, we can help you reduce waste on the next project. With better planning and a more tightly organized project, we can increase efficiency and productivity.

## Cost Management

Access to detailed and up-to-date costs for labor, equipment, rentals and inventory levels is essential to good budget management. The STS provides you with real-time cost reports that make it easy to review your budget and forecast future spending. We can also match these reports to your unique financial needs; they can be set up by purchase, work order, jobsite, project type or department to help you simplify tracking and invoicing. By carefully managing costs, we can help you save money throughout your project.

## STS Professional On Call

We want to be sure you receive all the potential STS benefits. That's why you will be assigned an STS professional,

*From Chaos to Control: We collect and enter data into the Safway Tracking System and provide you with easy-to-read reports on labor, materials, inspections and costs.*

who will handle everything from establishing project parameters, to providing your reports. You can rely on our STS staff to take care of all the details and answer your questions. We make it easy to take full advantage of the Safway Tracking System.

### Easy STS Access

As a web-based tool, the Safway Tracking System is accessible via the Internet. You can log into your STS account from anywhere; and as the system supports multiple users, you can choose who will have access to your data.

### The Safway Group Edge

By combining our expertise and knowledge with advanced planning and superior management tools, like the STS, we will work with you as a strategic partner, developing efficient solutions to save you time and critical resources. You can rely on Safway Group to help you meet

any access, scaffold, insulation, and/or coatings challenge. Since 1936, Safway has been a leader in scaffolding and innovative access services and solutions. Let us partner with you on your next project.

Through **SMART Safety** practices, **SMART Planning** methodologies, **SMART Process** discipline and **SMART Technology** advancements, our **SMART People** come up with ideas every day to deliver **THE SMART WAY™**. The result? Safe, productive work sites – and the lowest total installed cost.

“Safway is the only access and specialty services company that has a system, which provides real-time inventory information and allows me to track equipment and materials across several projects. The fact that it’s web-based means I have immediate access to reports and cost information from anywhere, anytime.”

- Total Industrial Plant Services, Inc.

With improved visibility into your project you can stay on top of key performance indicators and proactively manage budget, labor, equipment, inventory and scheduling. Your STS professional will work with you to determine which reports will be most useful to you based on your needs. Then you'll be able to access these project reports right on your own computer 24/7 via the Internet.

**Labor**

Current information regarding every employee – including work performed, hours and craft – is available through this series of labor reports.

**Materials**

Material reports provide information about equipment, from quantities, descriptions, hard costs, unit pricing, daily rentals and equipment location, to shipping and return transactions, erection and dismantle dates and number of days standing.

**Inspections**

These reports include a list of scaffolds that require inspection, and include inspection type, tag status prior to and after the inspection, the dates and inspector. Checklists can also be configured and added.

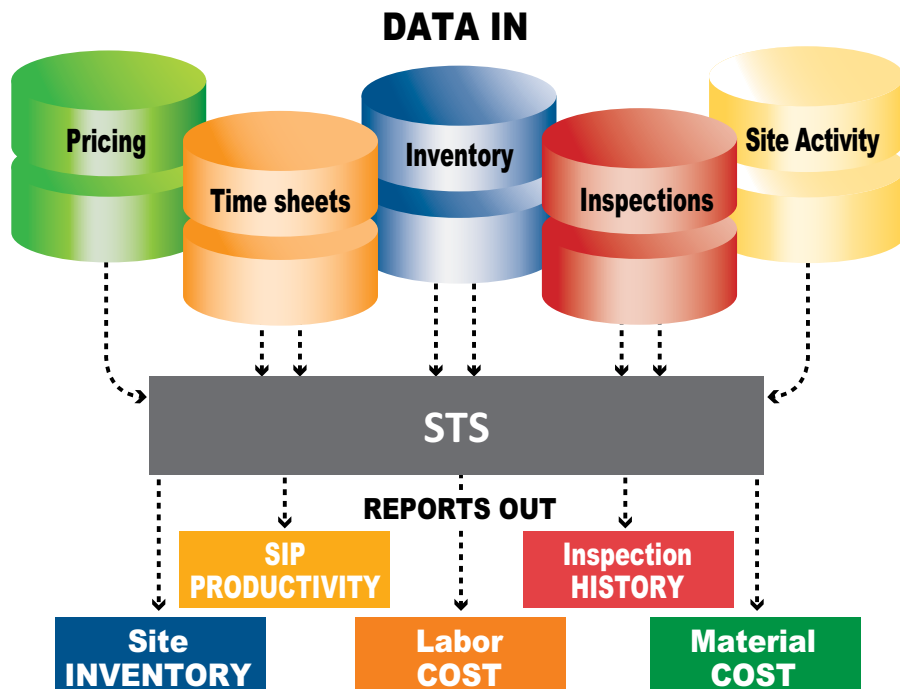

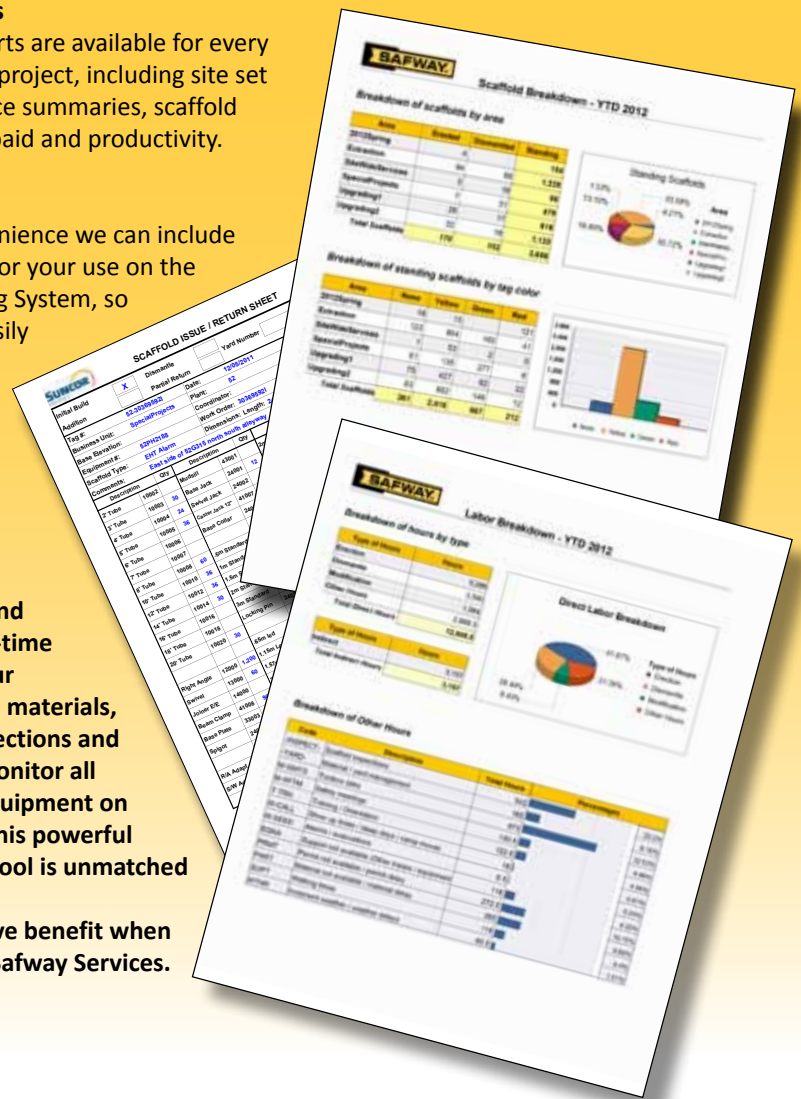

**Job Summaries**

Summary reports are available for every aspect of your project, including site set up, labor invoice summaries, scaffold details, travel paid and productivity.

**Forms**

For your convenience we can include various forms for your use on the Safway Tracking System, so they can be easily accessed as needed.

**STS captures and generates real-time data about your project's labor, materials, costs and inspections and allows us to monitor all activity and equipment on your jobsite. This powerful management tool is unmatched in the industry and an exclusive benefit when working with Safway Services.**
